

13/24E PLANTS AND SEEDS

To: Clerk, Colwich Parish Council From: Cllr Upton-Loach

Cttee: **Environment**

Date: **04.03.2024**

Title. To consider and agree to purchase suitable plants for a permaculture demonstration (pallet planter) and a local seed mix for Help Nature Thrive.

Issue.

Stephen Moore has created a pallet planter – an example of permaculture – it does not need to be placed on fertile soil and does not require large amounts of watering – a great way to add some green to inhospitable areas.

It is really important not to introduce species that are not usually found in an area, therefore Help Nature Thrive would like to purchase some local seed mixes to use in project areas.

Recommendations.

Councillors are invited to set a spending limit on this and to bear in mind it is likely to be a low cost.

Background.

Simon (SinCH and Help Nature Thrive representative) is able to inform on permaculture.

Supporting Documents.

None.
