And you can separate your drivers' private and business mileage with Business Mileage Monitor, making your HMRC compliance easier.

More efficient drivers

Drivers going out of their way to fill up with fuel causes delays and costs you money. With the UK's largest network of more than 7600 conveniently located fuel sites, you're never far from an Allstar site.

Over 90% of fuel sites in the UK accept an Allstar card, including all major oil brands and supermarkets, which means that your drivers don't have to deviate from their routes to refuel.

Reduce the risk of fraud

Don't leave your organisation open to the threat of fraud. The Allstar One card increases your fuel card security through our chip technology.

You can configure each card so that your drivers can only purchase certain products, such as specific types of fuel or consumables, including engine oil or car washes.

These configurable purchase limitations work hand in hand with our Level 3 line data reporting to give you a clear picture of your drivers' spend.

More than just a fuel card

Take complete control of your vehicles with our comprehensive fuel management solutions.

Why the Crown Commercial Service framework?

More than 3000 public sector organisations already work with us through the CCS framework RM1027 to run their vehicles more efficiently.

Why the framework?

When spending public money, you need to show that you've conducted a fair process and have chosen the best value supplier available.

But tendering for services amongst suppliers takes time and incurs significant administrative resources. CCS have done this for you.

Best value

using the framework guarantees that you're getting the best price available from a pre-approved supplier, making it a Government convenient alternative. Request a callback

Peace of mind

And, because you don't need to tender, you don't need to invest unnecessary administrative time proving you've picked the right provider.
